

## SB, Fuel cooler bracket, FS 7000, 2018-06

### SYMPTOM/DESCRIPTION

To prevent damage from vibrations a Radiator assy fuel cooler bracket kit is now available for the fuel cooler on FS 7000. A bracket is mounted on the radiator frame to hold the fuel cooler in place and minimize movement.

### AFFECTED UNITS

FS 7000 D / DL / DMT.

### PROCEDURE

1. There are 3 pcs of foam included in the kit, apply them on the inside of the bracket (see figure 1).

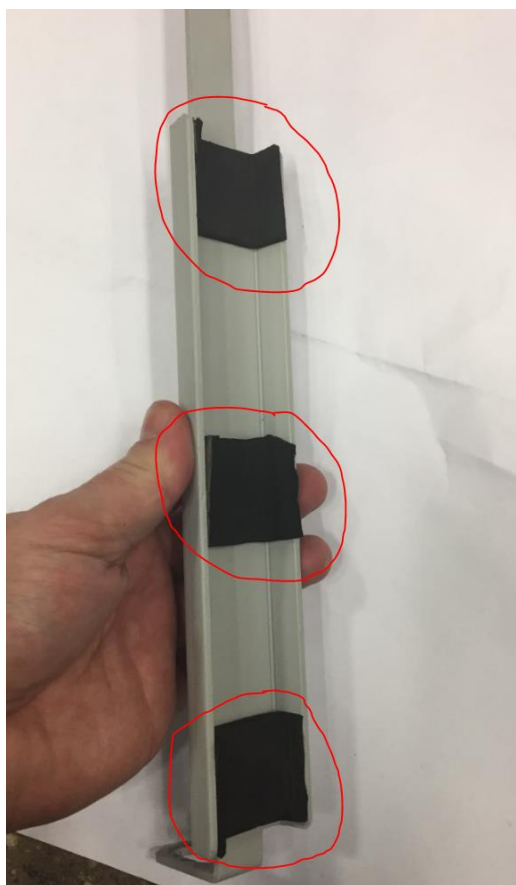

Figure 1:

2. Fix the bracket to the fuel cooler and mark up 2 holes to drill (see figure 2).

Figure 2:

3. Drill 2 holes with a 9mm drill bit. Use a protection plate to prevent drilling through the fuel tank (see figure 3).

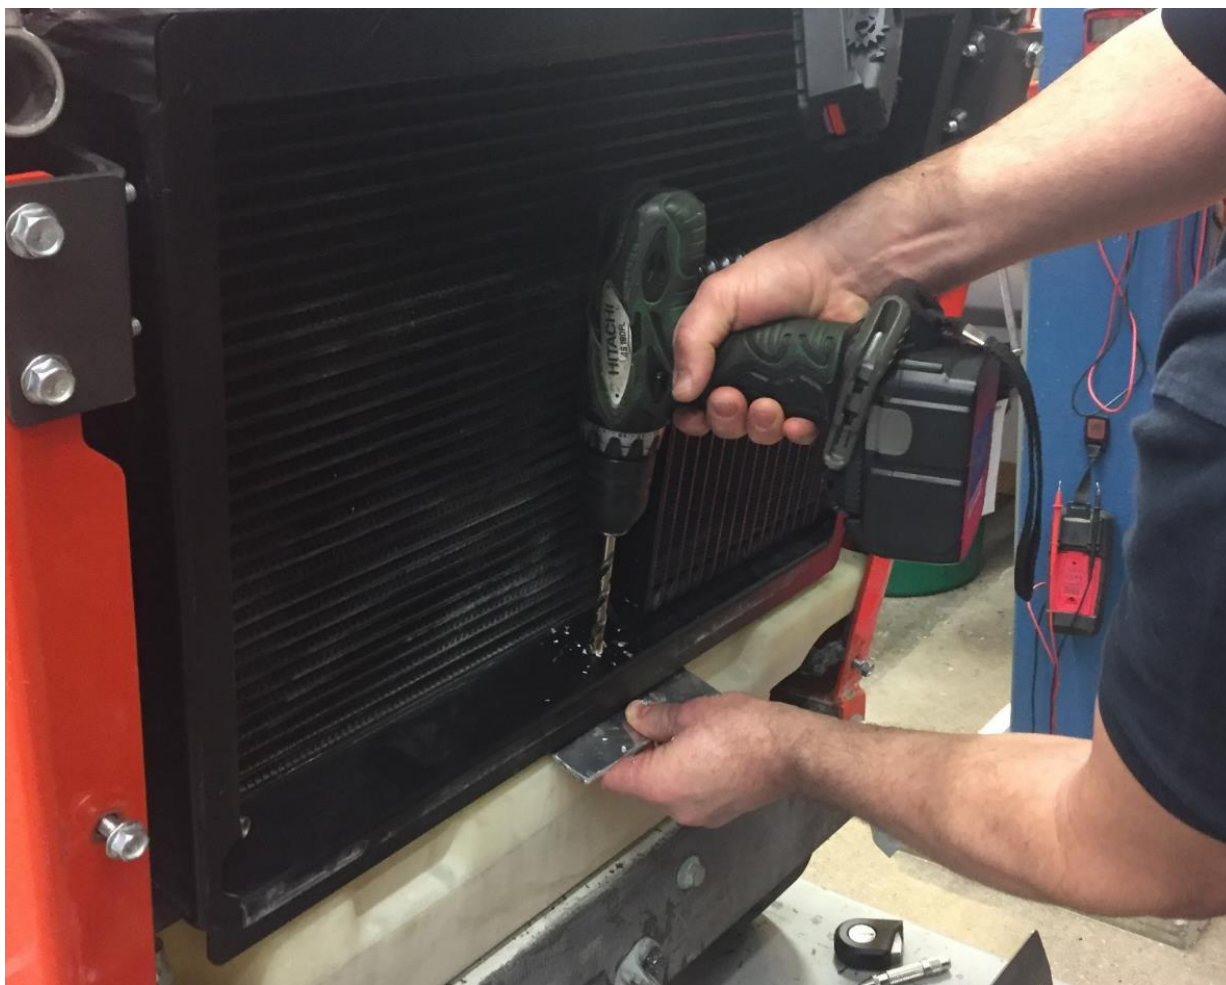

Figure 3:

4. Mount the bracket with the M8 bolts included in kit (see figure 4).  
Set the length and tighten bolt (1) and then tighten the bolts to cooler (2).
