

SB, Blade shaft greasing, FS 400 LV, 2018-10

DESCRIPTION

To increase the life of the blade shaft bearings on FS 400 LV the maintenance schedule has been updated.

Lubrication
Blade shaft, every 50 hours daily

The operators manual will shortly be updated to mirror below procedure.

PROCEDURE

Grease the blade shaft daily. Connect the grease gun and pump 3-5 strokes or until grease can be seen at the edges.

DIN 51825 grease classification:	K2K-30 or K3K-30
