

SB, Up-date, K30, K40, 2009-11

Above mentioned models have been updated with a new belt, of type 3PK. This also means that we have new front and rear pulleys.

We are also using the same 12" and 14" blade guards as for our other models. The new wet kit is also fitted to the machines.

All screws are now Torx 27 instead of 8mm hex head.

All the new spare parts can be found on our support site in the IPL, K30, K40, 2009-05 # 544 93 65-02.
